Use Case 1:

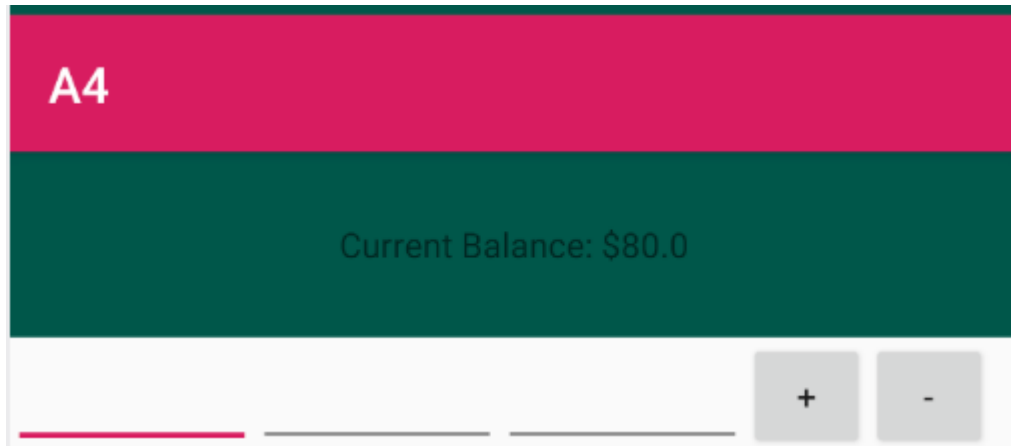

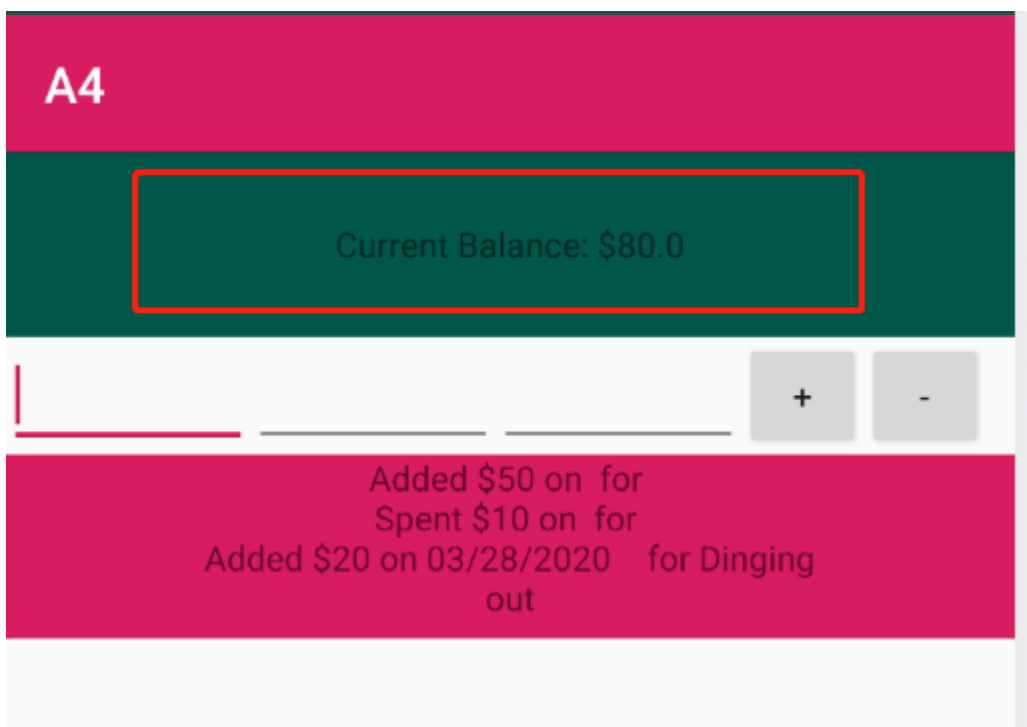

Download and open the app.

Use Case 2:

Here is your current money of your balance.

Input your data. The first line is the data, the second line is the money and the third one is for reason.

Use Case 3:

If you want to add $50 dollars on your account, you can input your number on the second line. Like this:

And click the "+" button. You will see the below "Added $50 on for", which is the history of your operation.

If you spend 10 dollars, you can input the number of the second line. Like this:

And then, click the "-" botton. You will see"Spent $10 on for", which is the history of your spending.

If you want to add date and reason. There is an example to illustrate.

Just input the data to the correct line and click the botton "+" or "-". You will get your point on this app.
